

# EOSC FESTIVAL 2023

## National Tripartite Event

### Poland

# Digital infrastructures

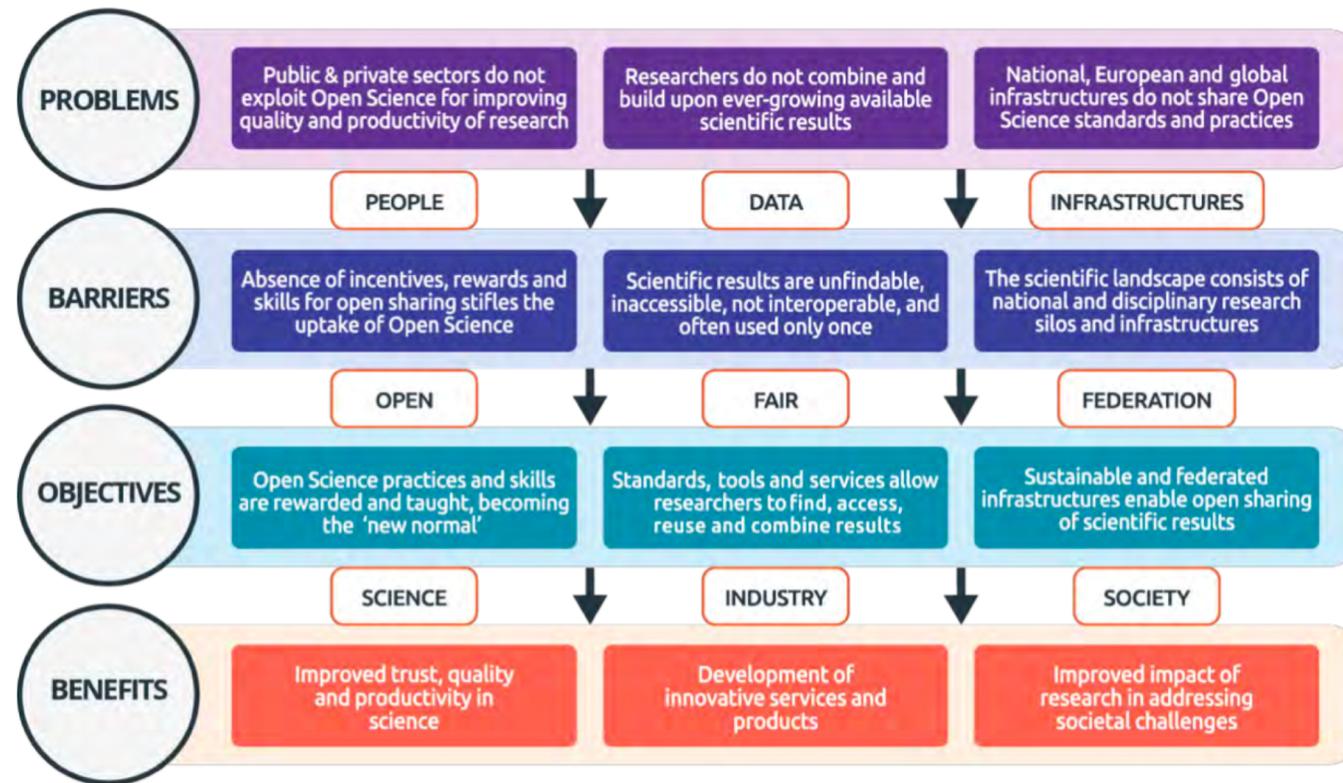

Krzysztof Kurowski, Norbert Meyer, Artur Binczewski, Raimundas Tuminauskas  
Poznan Supercomputing and Networking Center affiliated to IBCH PAS

# Strategic Research and Innovation Agenda of EOSC

- The **FAIR principles** in EOSC are no longer limited to open data issues, and they have been extended to cover the entire research lifecycle (**not only DMP**)
- The FAIR principles apply to **entire, often complex, and time-consuming research processes**, including distributed pipelines, raw data, metadata, publications, software, etc. located not only on your laptop
- Independently, we have been observing a **significant increase in the volumes of data** generated and used by scientific communities and instruments
- Thus, we need **reliable digital infrastructures**, but ...

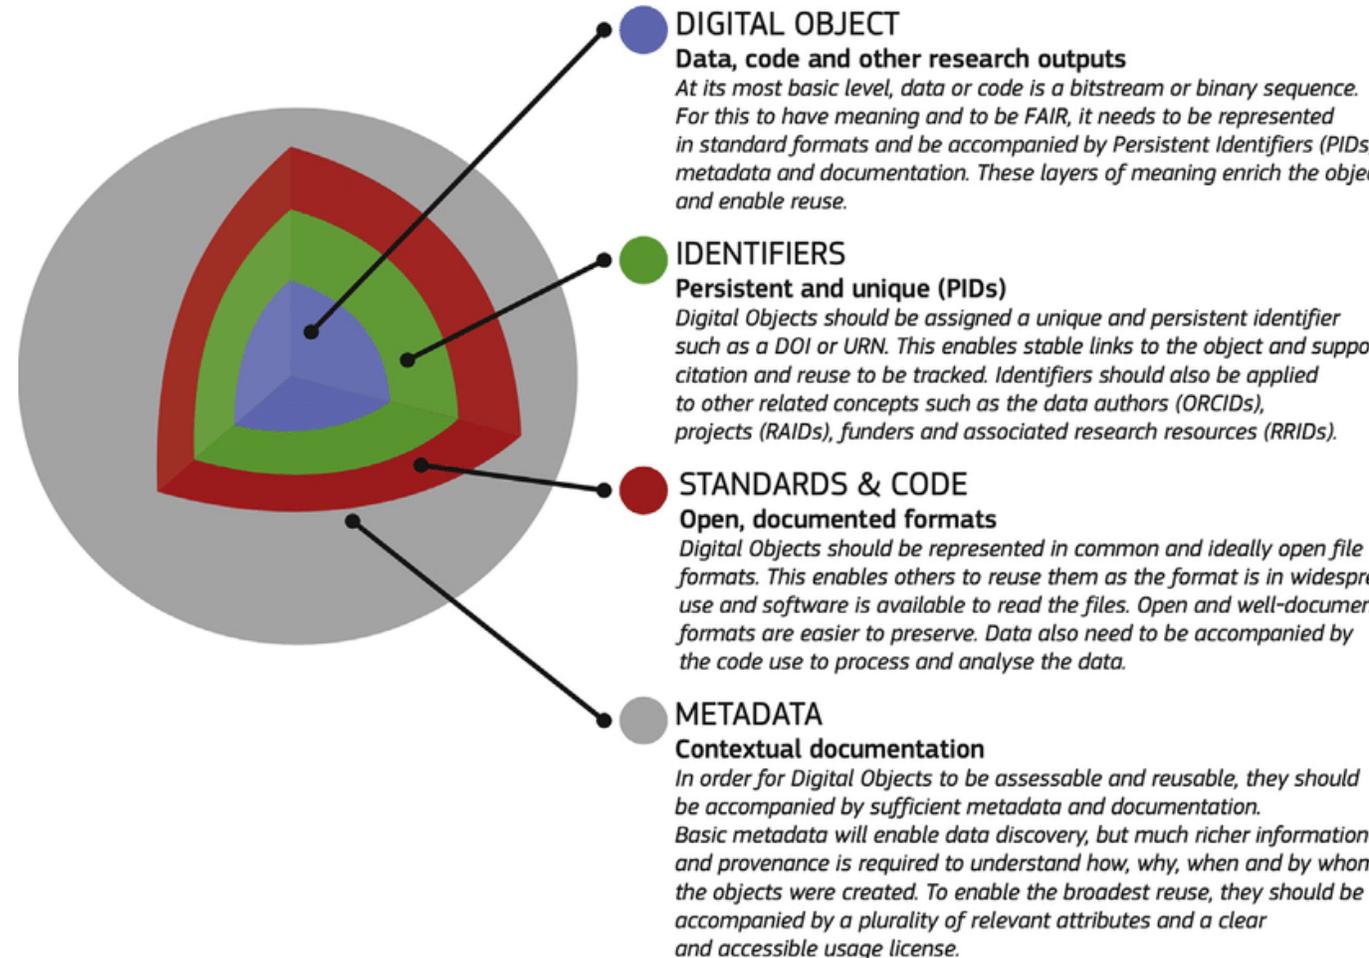

## European Open Science Cloud Objectives Tree

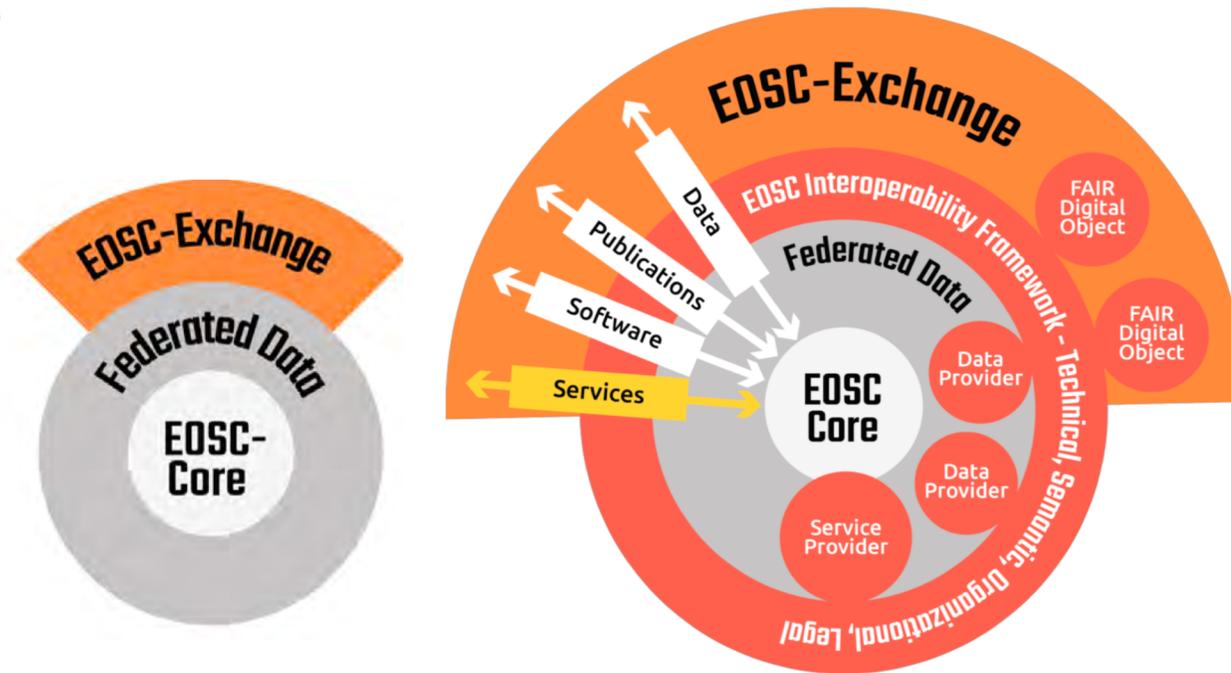

# Strategic Research and Innovation Agenda of EOSC

- Additional requirements related to semantic descriptions of data (metadata) and data identifiers - **digital research objects**
- Open standards and requirements for **scientific data processing** (workflows/pipelines)
- New requirements for **long-term storage**, and archiving of **scientific data and repositories**
- Requirements for **federated**, secure and **controlled access** to scientific data
- Ensuring and supporting **interoperability** at technical, semantic, legal and organizational levels

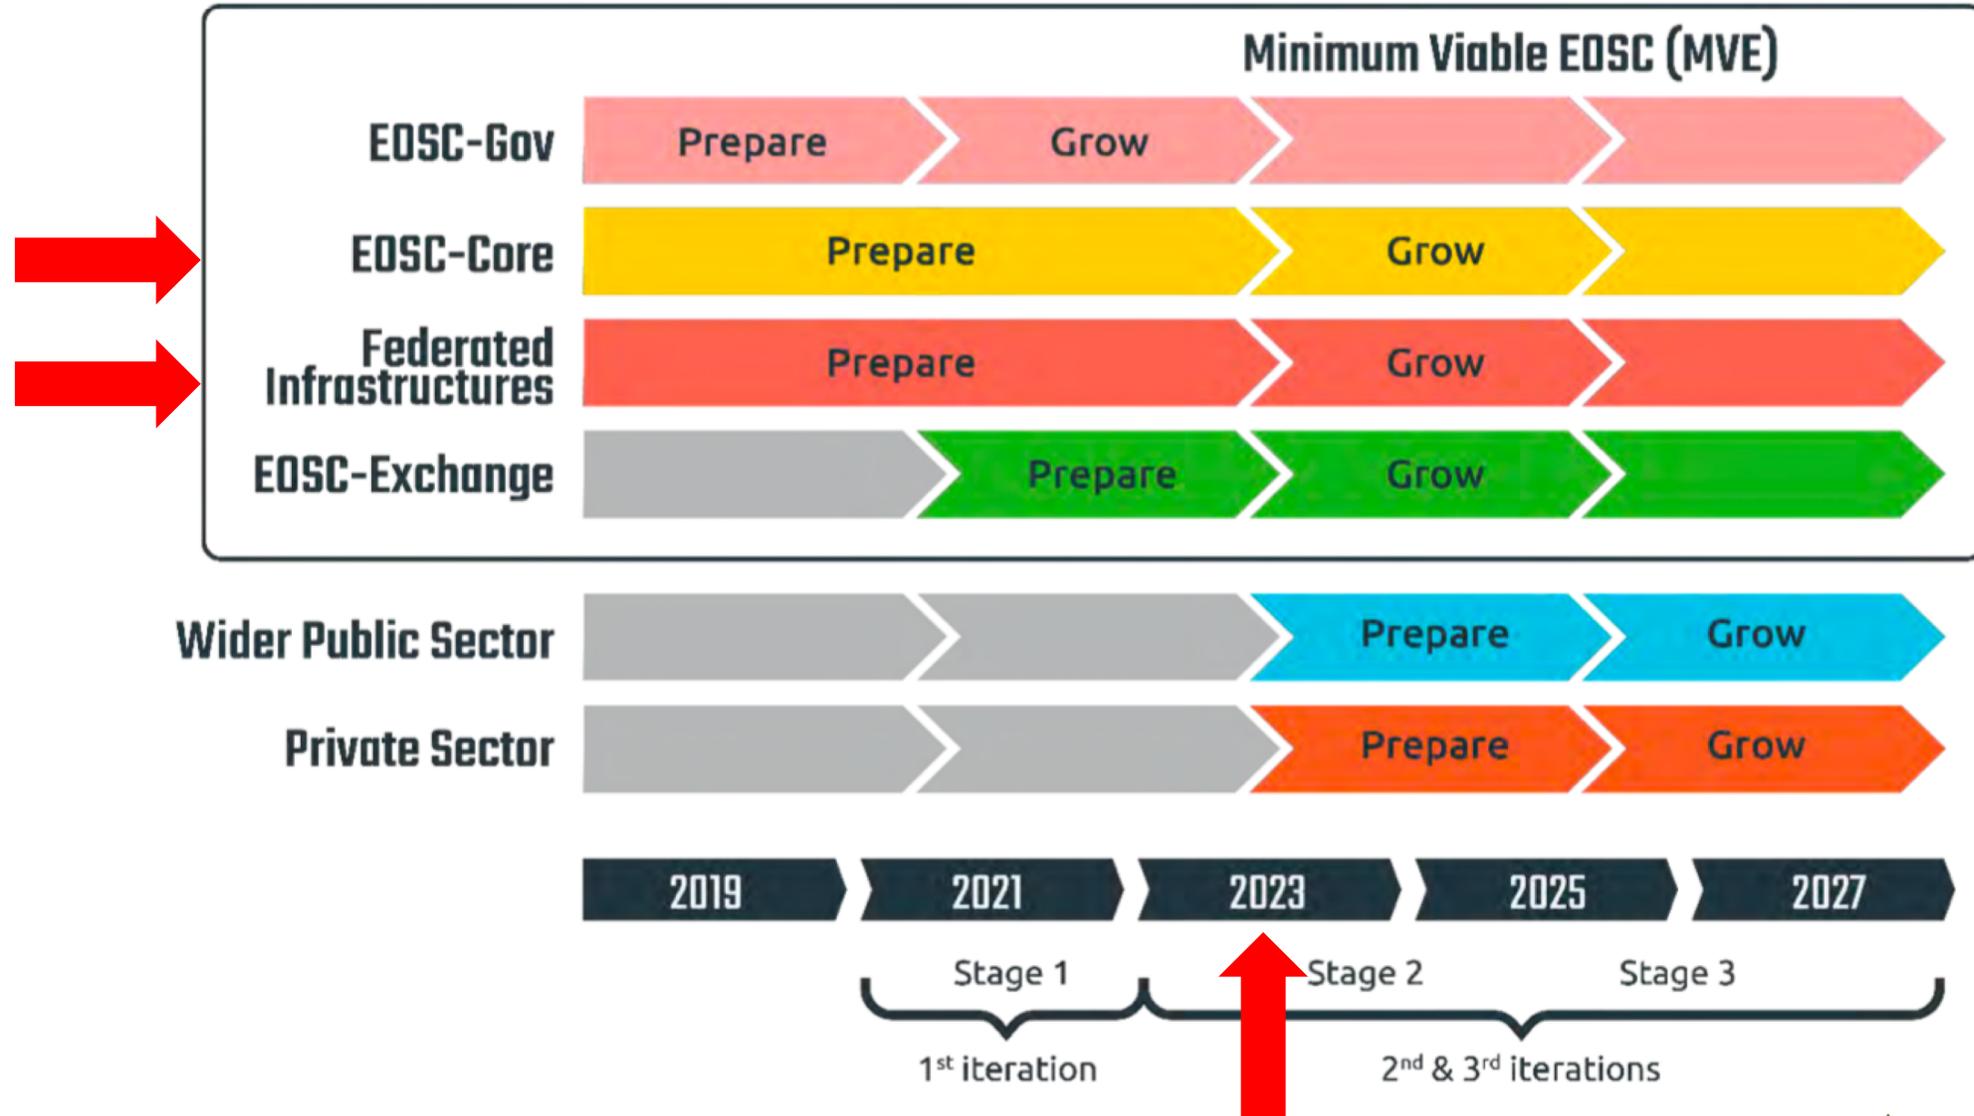

# Strategic Research and Innovation Agenda of EOSC

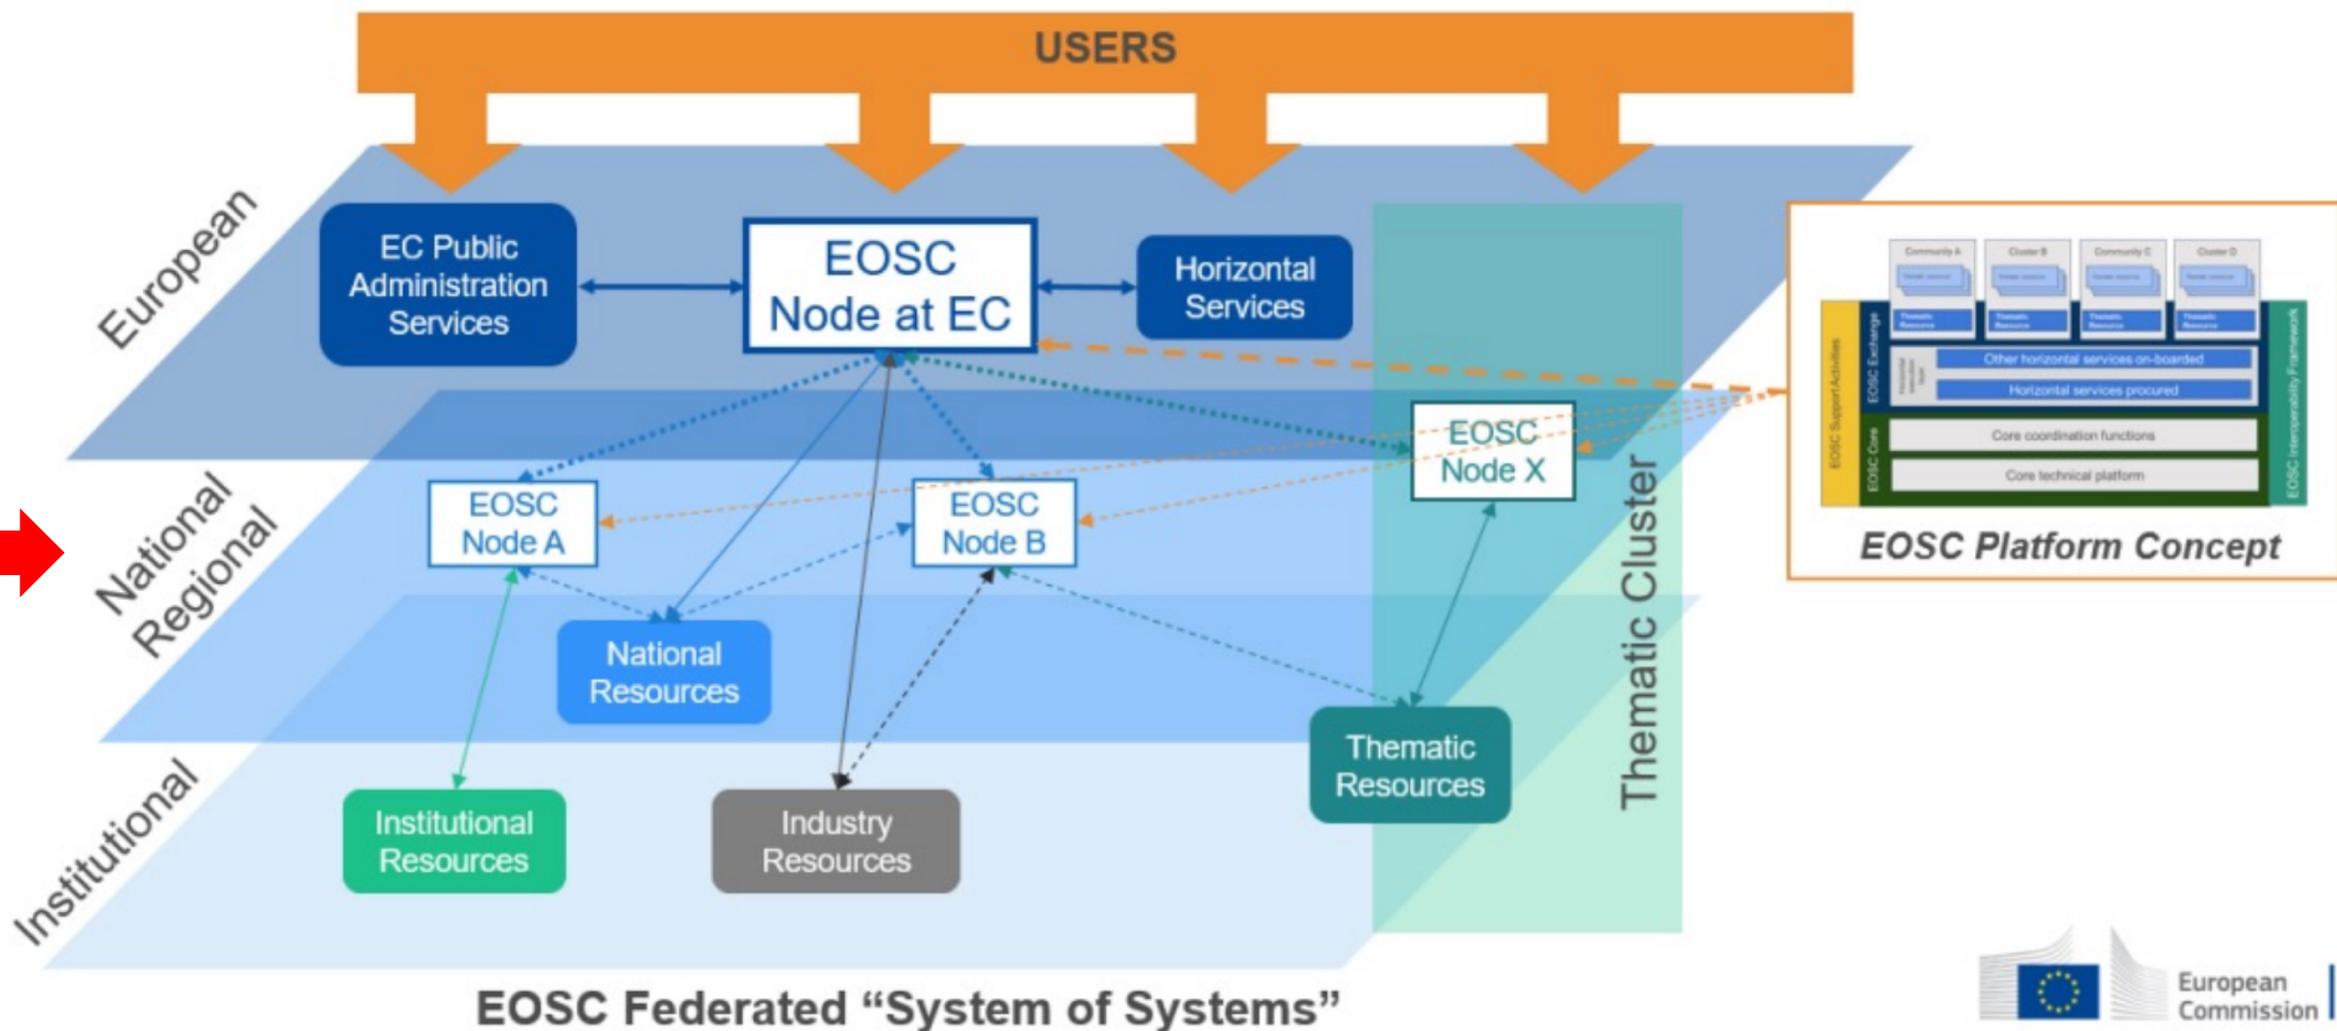

- One of the key EOSC objectives is to develop added value from a federation of infrastructures by providing the core functions of the **Minimum Viable EOSC (MVE)** that should enable **EOSC operations (the EOSC-Core)**
- Multi-user environments like EOSC require **federated infrastructure for Authentication Authorization Infrastructure (AAI)**, an identity management service for scientists to enable them **easy access** to all the digital objects and resources (e.g. Eduroam for WiFi)
- New rules for accessing and sharing scientific data including **Persistent Identifiers** for digital objects (PIDs) with services for generating unique IDs for scientific data

# Computing: PRACE-LAB I/II + EuroHPC PL

## PRACE-LAB

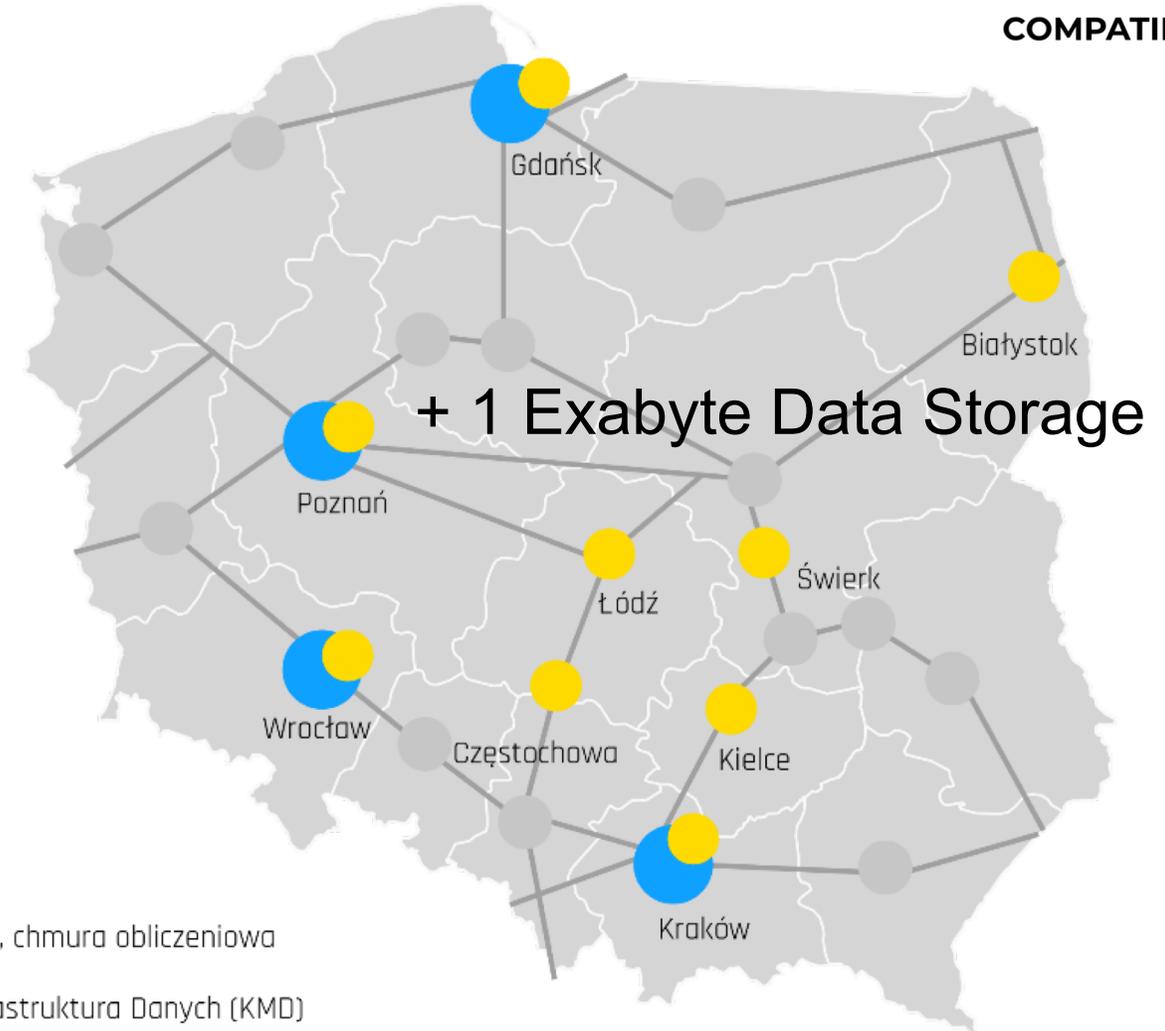

Cooperation on Advanced Computing in Europe

## PRACE-LAB2 pracelab2

Cooperation on Advanced Computing in Europe

# Storage: National Data Storage

# BIOLOGY USE-CASE

LARGE-SCALE DIGITISATION  
OF SPECIMENS: PLANTS, ANIMALS, FUNGHI  
PARTNER: ADAM MICKIEWICZ UNIVERSITY  
FACULTY OF BIOLOGY  
RESEARCHERS NEED:

Collaboration, ease of use, document editing  
Dropbox-like experience  
Persistent data storage  
in a multi-tenant repository  
with indexing and search

DATASET:

- 100+ TB,
- 100000s of objects

# RADIO-ASTRONOMY USE-CASE

## LOFAR LONG-TERM ARCHIVE

### Acquisition, analysis, processing

Distributed data sources

Centralised correlation,

Distributed storage

Processing in HPC centres

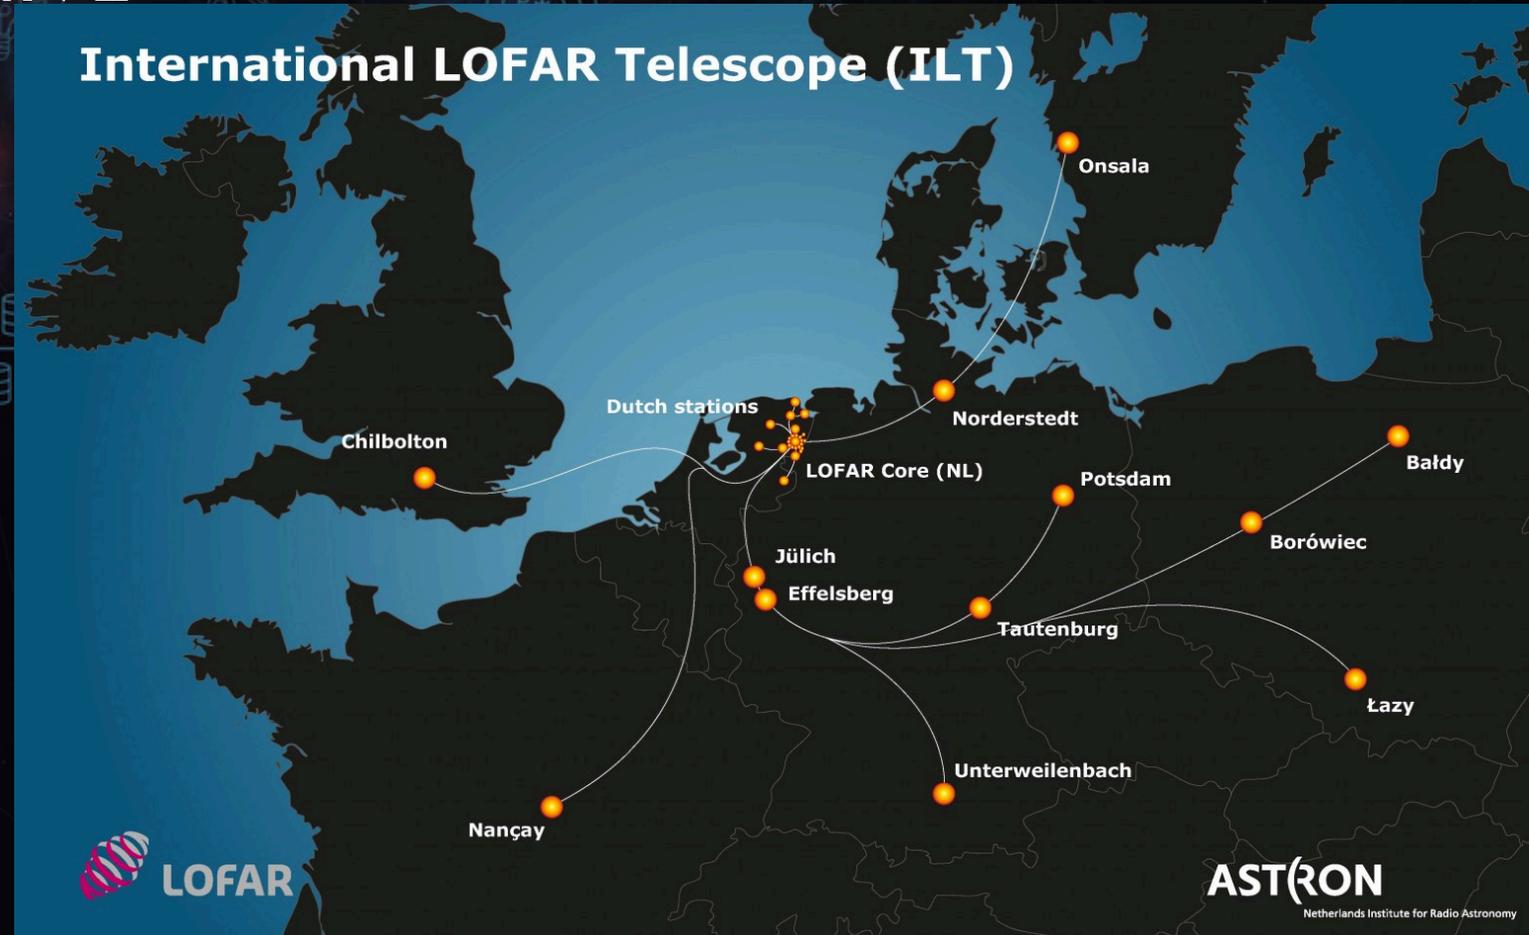

Data access to project members

### LTA (Long-Term Archive) in PSNC:

Constant data stream: **10 Gb/s**

Since 2015, now **20PB+** of data

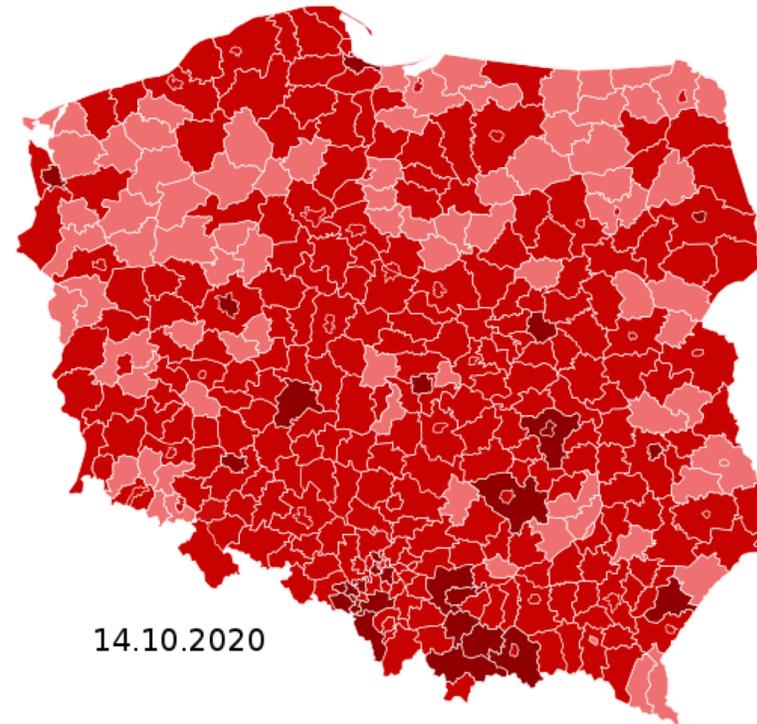

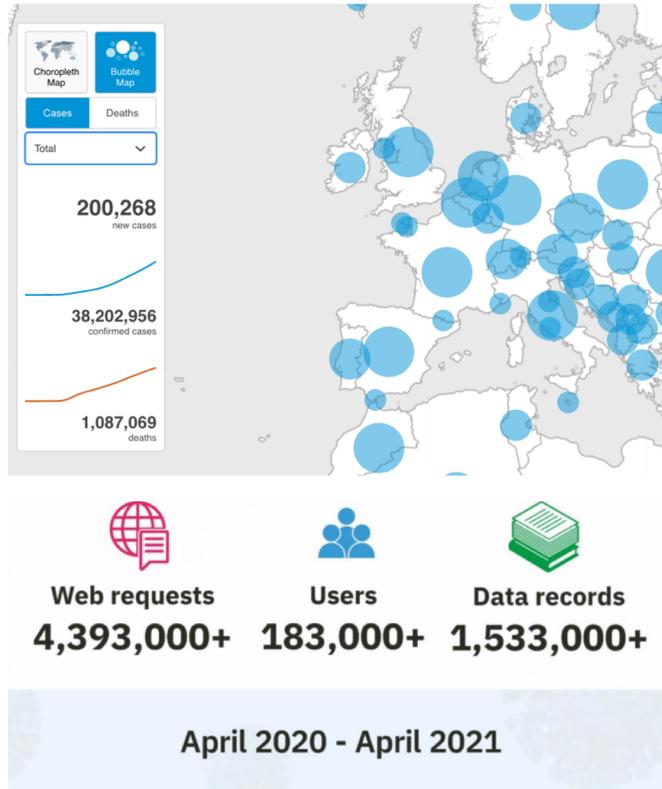

Tape storage + disk cache

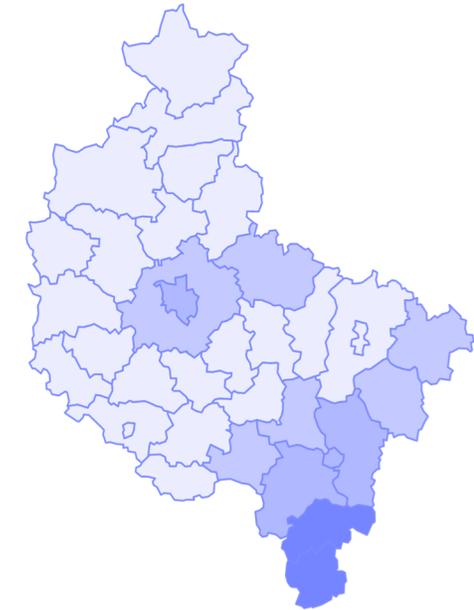

# Covid-19 USE-CASE

## WHO Coronavirus Disease (COVID-19) Dashboard

Data last updated: 2020/10/15, 11:03am CEST

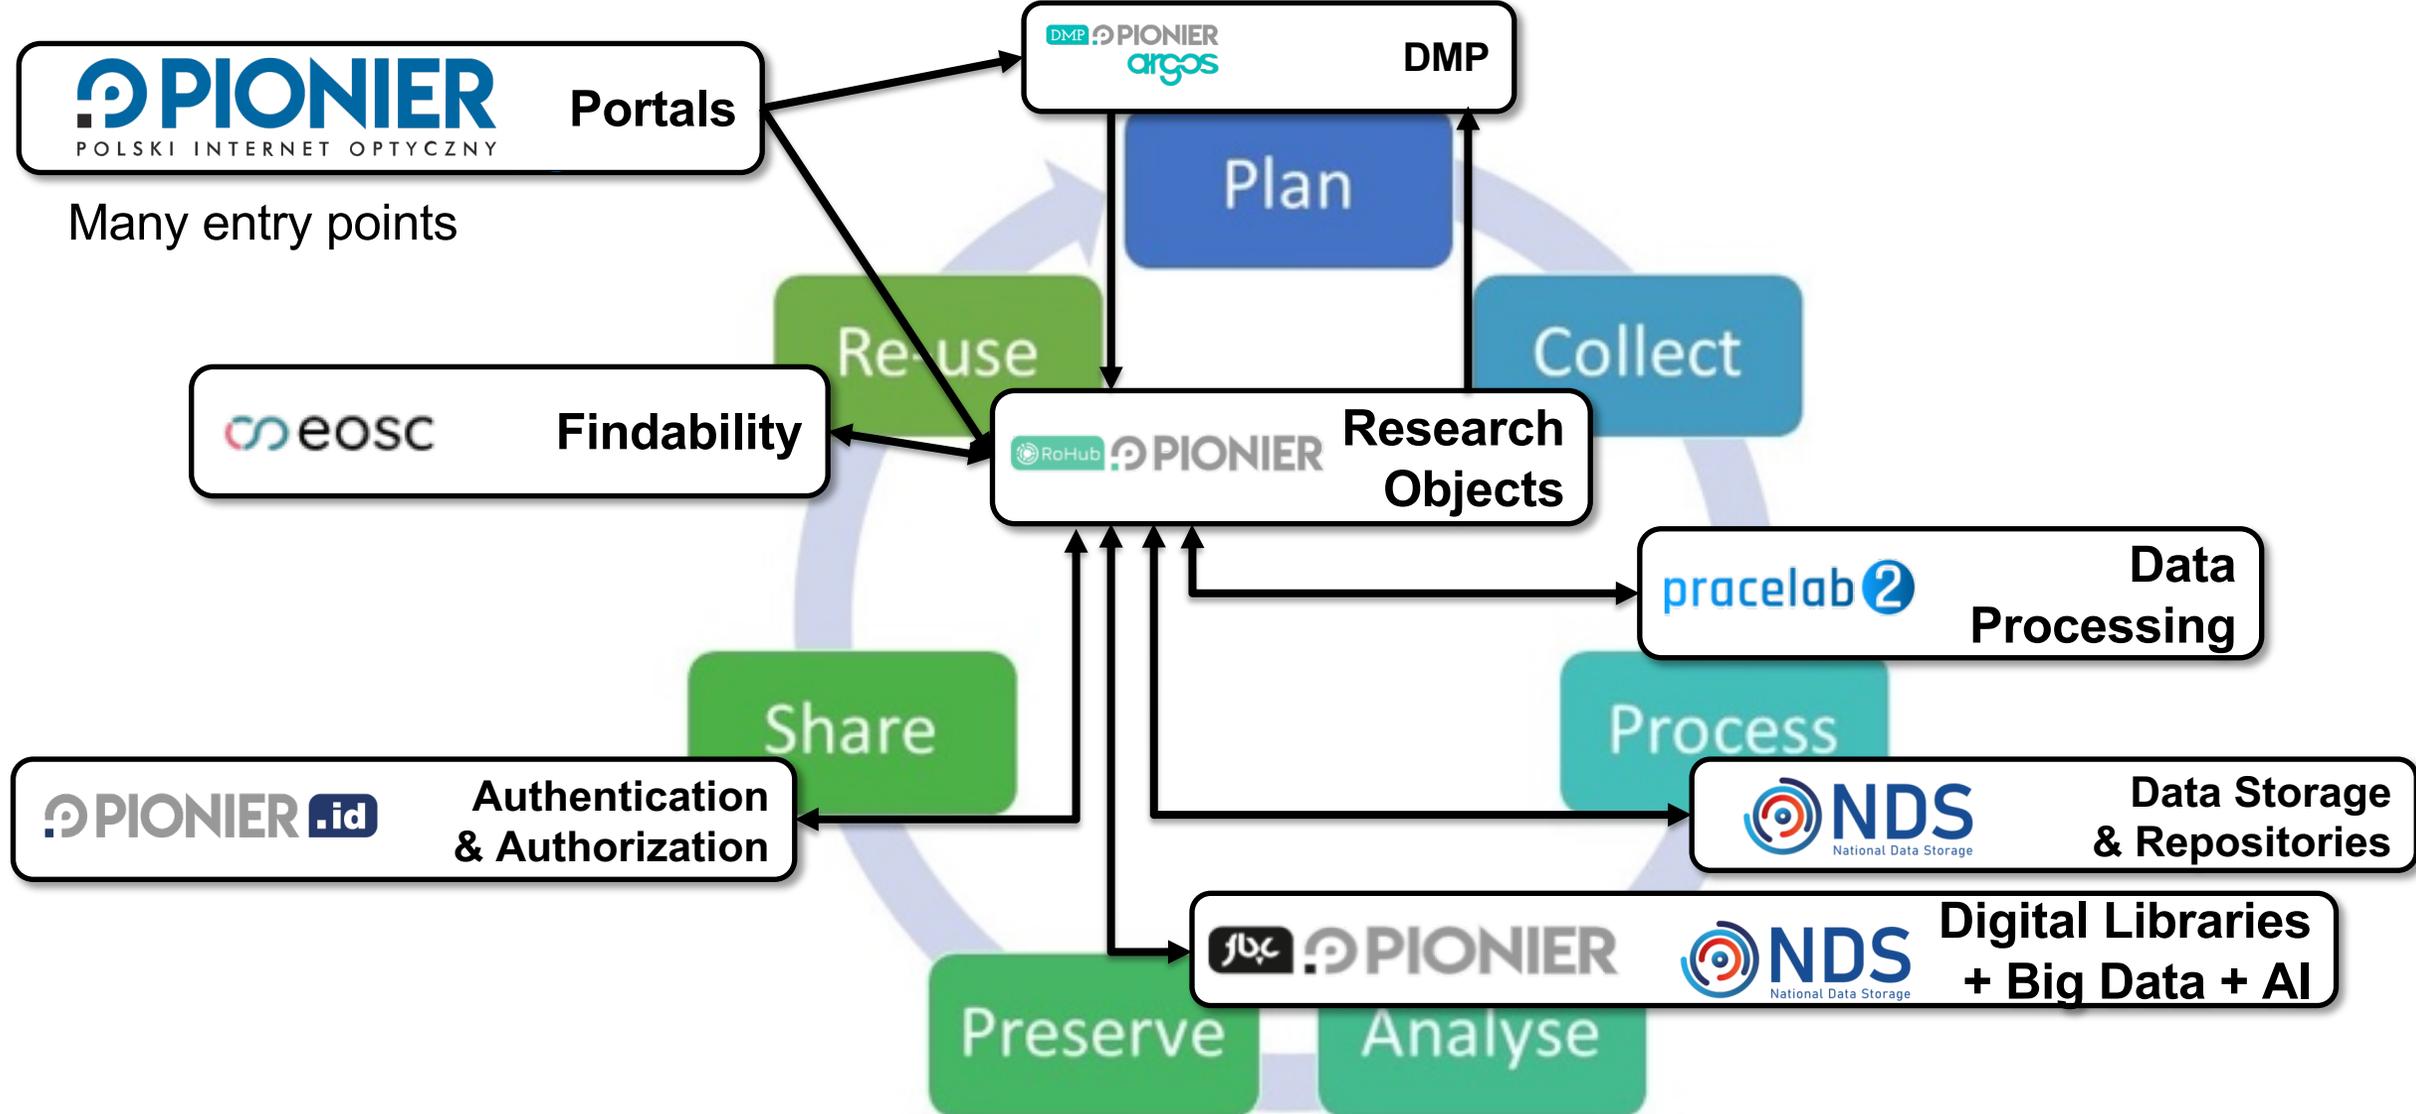

14.10.2020

Digital Response to COVID-19
