

Open Science in Policy and Practice at the University of Silesia in Katowice

Dr Dawid Matuszek
Head of Science Department
University of Silesia in Katowice

Global context

2021: UNESCO Recommendation on Open Science

European context

2017: European Research Council (*Guidelines on Implementation of Open Access to Scientific Publications and Research Data*)

2019: European University Association (EUA): Research Assessment in the Transition to Open Science

2022: Strategic Research and Innovation Agenda (SRIA) of EOSC

Polish context

2015: Directions for the development of open access to publications and research results in Poland

2018: Act of July 20, 2018, on Higher Education and Science

2020: National Science Centre (NCN) policy regarding open access to scientific publications

2021: National Act of August 11, 2021, on open data and the reuse of public sector information

2022: State Science Policy, Ministry of Education and Science (MEiN)

Internal regulations

- Institutional Openness Policy of the University of Silesia in Katowice (Directive No. 3 of the Rector of the University of Silesia in Katowice dated January 8, 2020)
- Directive No. 147 of the Rector of the University of Silesia in Katowice dated October 13, 2022 on the preparation, implementation, and settlement of projects and tasks financed or co-financed by external funds.
- Directive No. 80 of the Rector of the University of Silesia in Katowice dated May 15, 2023

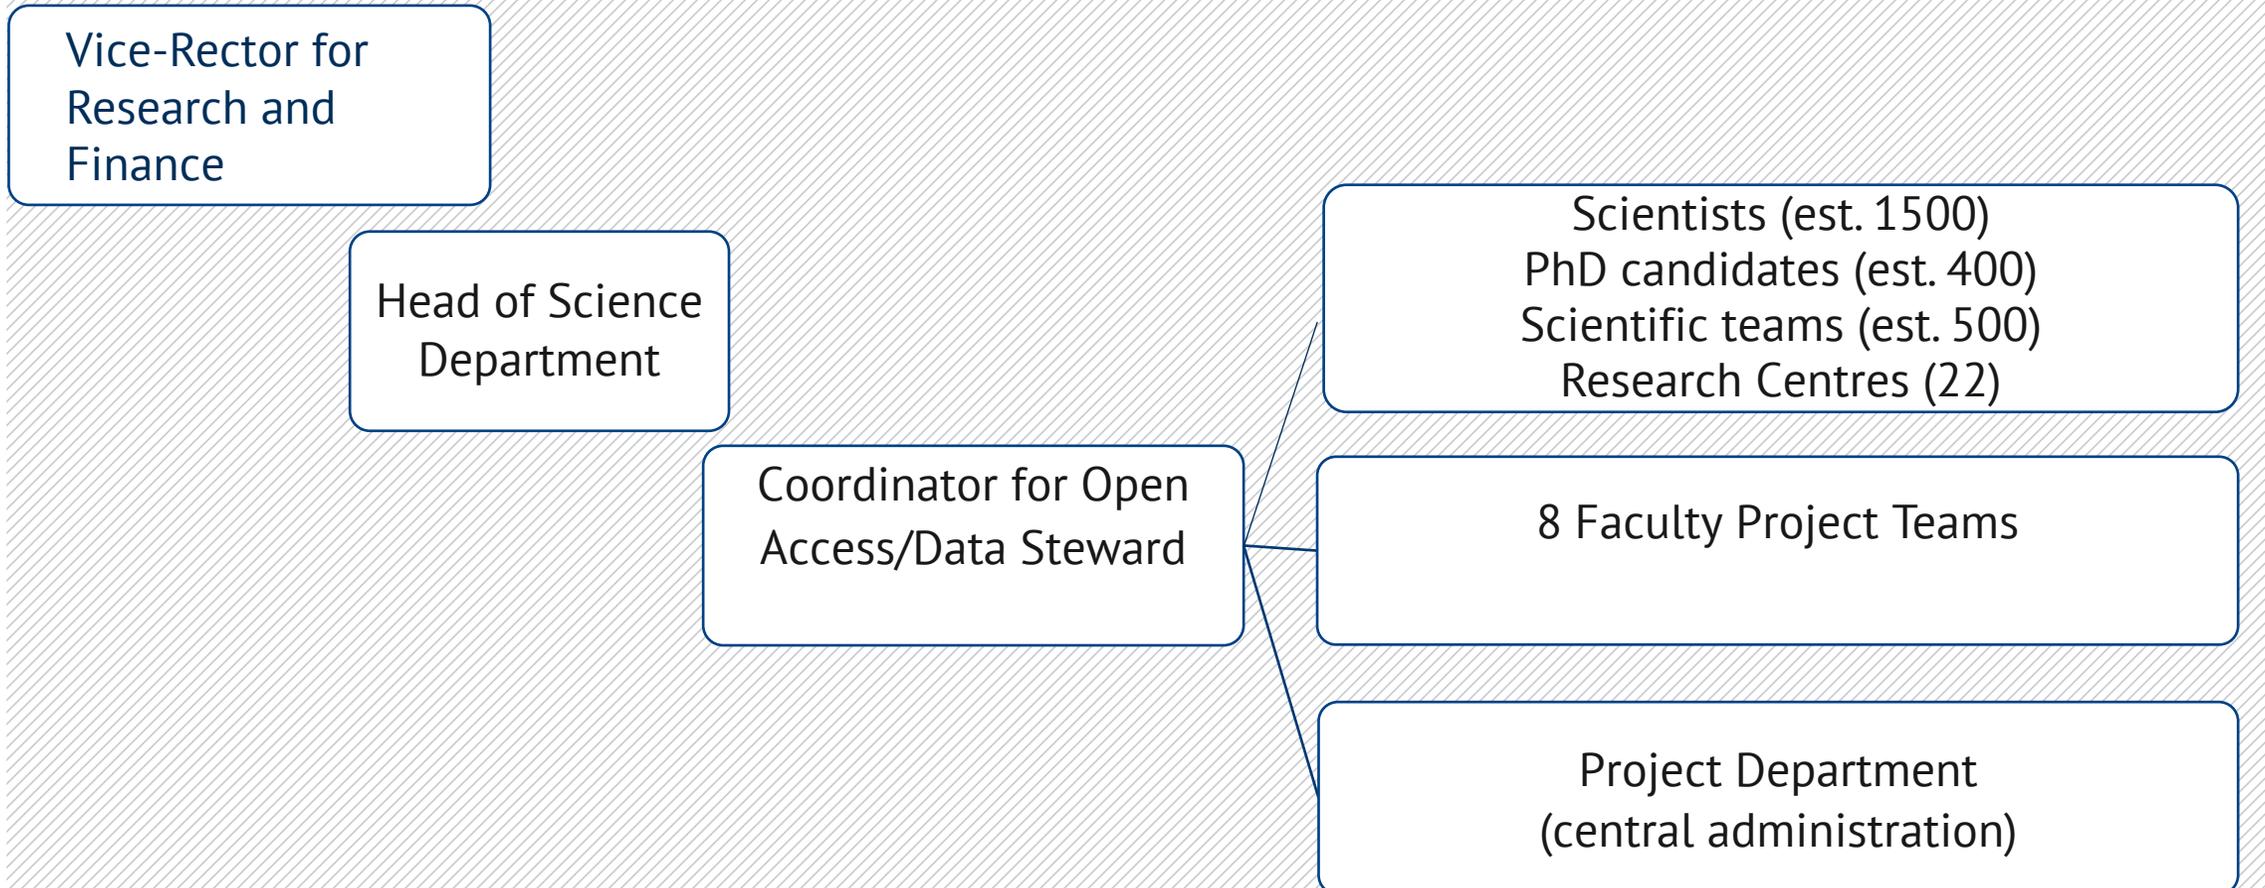

Assumptions and innovations

1. Recognition of the role of data steward with definition of the position
2. Recognition of the research data management process and the roles and responsibilities of data stewards
3. Recognition of the data management structures at USIL, including: coordinator position (central administration) and data stewards (based at the faculty level)
4. Recognition of data management as an activity requiring consideration of the specifics of various research areas
5. Obligatory RDM training for PI's

Stage 1: Initial OS structures

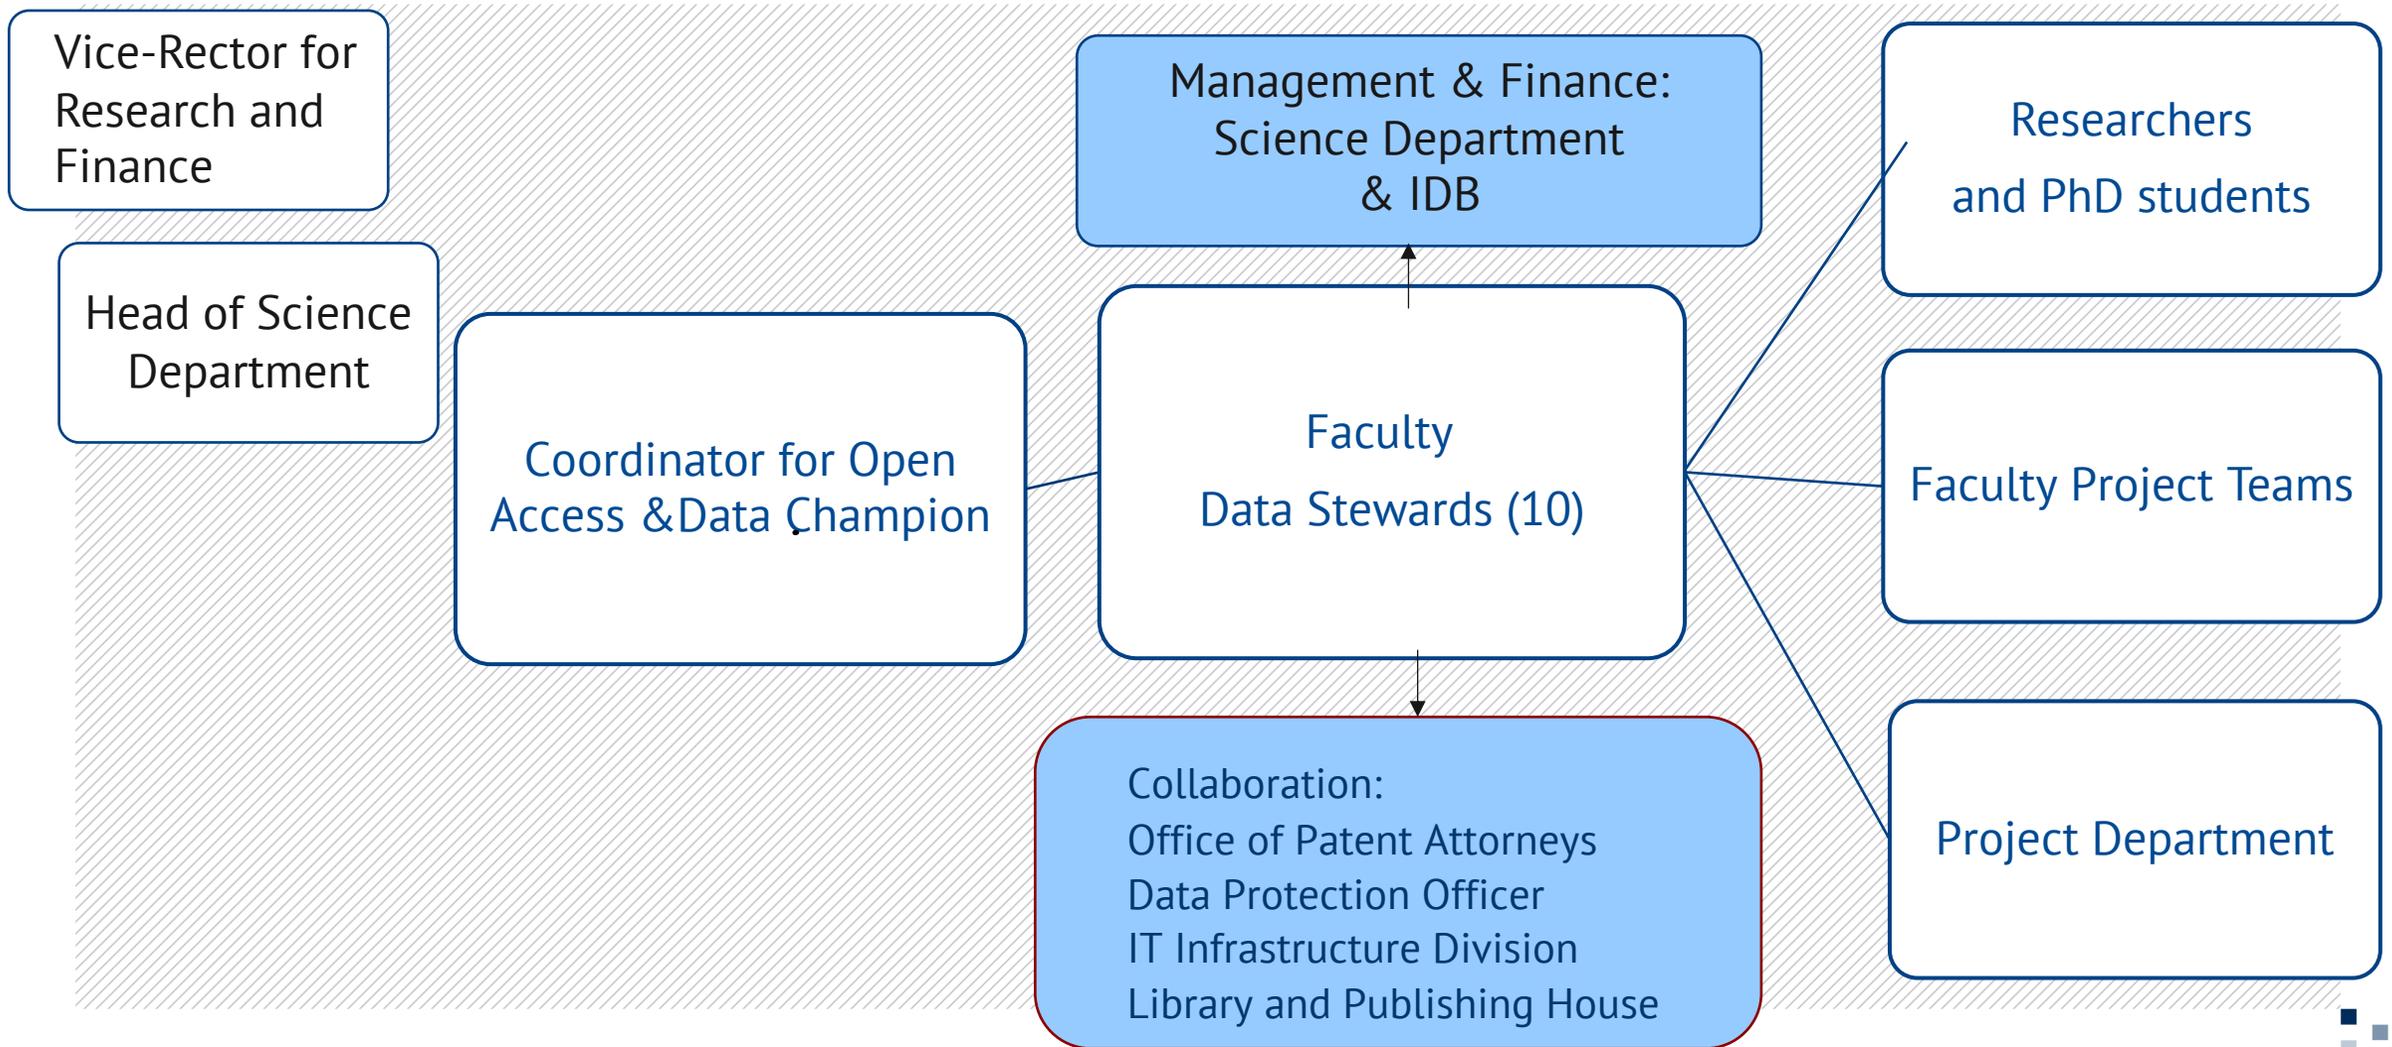

Stage 2: Transition to OS through capacity building

- Training for administration and researchers in Polish and English [2021/2022: 300 training participants].
- Inclusion of data management in the curriculum of the Doctoral School (Ethics Module, 30 teaching hours/7 groups, including one in English; 100 doctoral students in 2022).
- Current information system for central and departmental administration staff (mailing).
- Preparation of USIL Research Data Management Manual [in Polish and English] – developed to USIL Faculty Research Data Management Manuals (research area specific tools).
- Repository: RepOD [Institutional Collection of the University of Silesia].
- Change in internal regulations by Directive No. 80 of the Rector of the University of Silesia in Katowice dated May 15, 2023.

Stage 3: OS structural advancement

OS requires investment in human resources

Data Steward - Research Data Management Annual Call 2023/2024:

- Up to 300,000 PLN allocation for financing the program from the Research Excellence Initiative
- Outcome: 10 USIL employees in DS Programme provide RDM services to USIL faculties (8 project units, researchers and PhD students)
- Additional 8 volunteers attending the training programme
- Internal and external trainings, including NCN webinars and RDM for Data Steward Course at NAVOICA

Practice-based and domain-focused Data Steward Training: "One University - Many Opportunities. Integrated Program" co-financed by the European Union from the European Social Fund (in progress)

The 3rd FAIR Impact Call (infraEOSC project): FAIRification of the USIL OS policy and practice (future plan)

Stage 4: Data Steward Community at USIL

Community-based and bottom-up solutions as economically and substantively effective approach to human resources development in the field of RDM

Be Open - Be Scientist! The global transformation of science. **Policy Perspective.**
